Proposal to fund the H3 Organisation

An organisation that is going to fix Climate Change with five major initiatives that will add well over \$10 trillion to the global economy in the first year we implement it.

Funding proposal

- \$20 million loan from you directly to me.
- \$50 million back to you within six months.
- Another \$1 billion back to you within two years.

There is a lot more to the H3 organisation than the action to fix Climate Change.

The context

The H3 organisation has been under development for just over twenty years, and it contains a suite of global economic reforms that are designed to solve many of our biggest problems, but it does it in such a way so that those with all the money and power in this world, the dyed in the wool capitalists, will be even more keen to implement them than greenies and altruists (it's the only way solutions to major problems will ever be adopted, don't you agree). The H3 organisation also contains a significant amount of intellectual property so that it can fund itself in perpetuity. It's interesting what you can come up with when you "lock yourself in a cave" for twenty years. There are a number of **books** I've written to accompany this launch, and there is at least a trillion dollars worth of **proof of substance** I've also made available.

The process

1. We push forward something called the **CNGE Initiative**. It is a plan to stabilise the global economy by creating a new central bank for the world to replace the \$40 trillion lost or expended during COVID. The way we push it out is with a big shock announcement all over the world and everything ready to implement in that moment, which will have the impact of putting governments, corporations, and the general public in the mindset of "waiting for Christmas morning". It will have this effect because most major economies are "biting their nails" over the widely expected major downturn in the global economy, which this would avert, and because this is something we can do that fits inside the rules.
2. This will obviously create a huge profile splash for the H3 organisation. I assume we can agree that something like this (with its shock value, expectation, and global rollout) will create one of the biggest noises of the year????
3. On the same day we do the 'big shock announcement' for the CNGE Initiative, we also insert full page notices in major newspapers all over the world for the **H3 approach to Climate Change**. This, from the same organisation, will add to the 'shock value'.
4. As we're going through the process for the CNGE Initiative, the H3 organisation

will be funded through the roof courtesy of the profile splash, the substance in the [H3 approach to Climate Change, the books](#), and the rather significant “blue sky”.

5. After we implement the [CNGE Initiative](#), we immediately move to fix Climate Change at the same time as we start to ramp up H3 operations.
6. As soon as H3 funding goes past \$400 million, I pay you the \$50 million, be it in two months or six months.
7. As a consequence of ramping up H3 operations, enough money becomes available to be able to pay you an additional \$1 billion within two years. Again, there is far more to this than just Climate Change and the CNGE Initiative.

Supplemental

I'm not backing away from the fact that it is just me for now, but it won't be just me for long as soon as I have the money to do this. The first initiative is fully detailed and will be activated inside four days, temps will start to come on in about two weeks with a total of twenty coming on to help me do the first initiative, and there will be over two hundred permanent staff members at head office inside nine months. Staffing numbers accelerate from there. I will not try to be the CEO; it's probably not my forte, and in any case I will be the intellectual core of the operation and have “a thousand” other things to do. I'll be employing someone with decades of relevant experience to be the CEO and we'll have a clear chain of authority that flows through the CEO. I already have international shortlists for the nine key early roles in the H3 organisation (all of them are currently senior executives at large organisations), and I personally don't know any of the people on the shortlists. The main point being of course, no jobs for unqualified friends or acquaintances or family members; and family members of the top ten people (including me), never get to work at H3, whether they're qualified or not.
